※ All performance are based on 220V/3PH/60HZ. Specifications are subject to change without notice.

2015.07

Save Time! Save Money!**LTC-35 Series****Innovative Designs that Outperform Previous Models**

A medium-size 45 degree slant bed CNC turning center with box ways on all axes.

◆ **MORE POWERFUL**

- Extra powerful spindle motor - 30 KW / 40 HP
- Also available - high torque option motor and gear box drive (37 KW/ 49 HP)
- Tubular design with crossed ribs for extra rigidity
- New motor mount to reduce vibration for increased production

◆ **INCREASED CAPACITY**

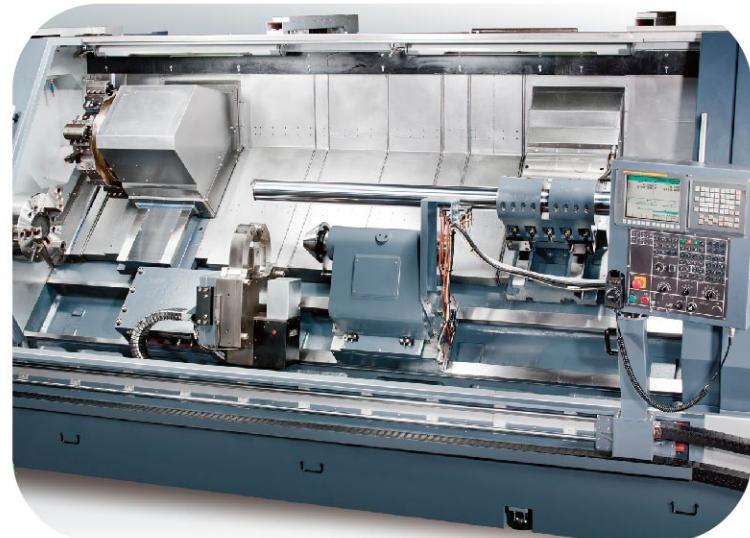

- Standard 15 inch chuck with 4.5 inch bar capacity
- Max turning diameter now 600 mm and max swing diameter 800 mm
- Z-axis available from 1,100 mm (43 inches) to 4,100 mm (161.4 inches) - excellent for cutting long parts

◆ **FASTER/MORE PRODUCTION**

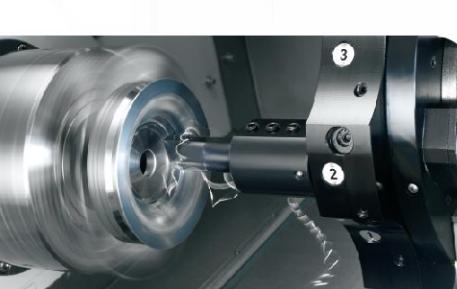

- Increased feed rate: X-15 M/min, Z-20 M/min
- 12 tool turret indexing time now 1.1 seconds

◆ **NEW ERGONOMIC DESIGN**

- Double pivoting operator panel for easy access to machine
- Quieter, due to wide angle drive belt
- Lubrication oil is separated from coolant
- Built-in way cover wash

1. Hydraulic Turret+120mm(O.D.) anti-vibration tool holder
2. Z1 axis travel: 1800mm; Z2 axis travel: 2550mm
3. FRU-B4 Programmable hydraulic steady rest
4. MT-5 Programmable tailstock
5. Rolling control panel +4mm door width

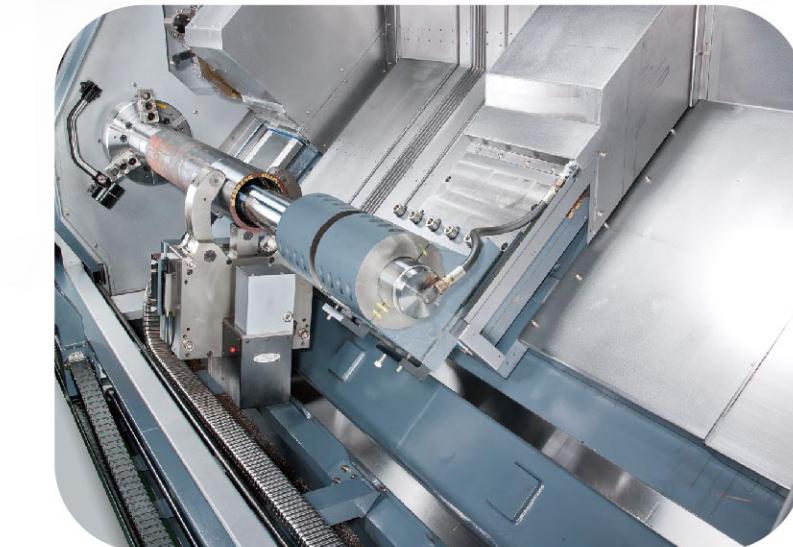

Power Turret available

Max. turning diameter 600mm

- 1.15" chuck +tool setter
2. Spindle speed: 2000rpm
3. Bar capacity: 115mm
4. Anti-vibration tool holder+ 10 bar high pressure pump + CTS

**Precision Rigid Spindle**

- Air jet around spindle nose
- Wide bearing spacing for high rigidity
- Special heat treatment for crucial components
- Highly accurate draw tube mechanism
- Precision Labyrinth seal
- Large diameter quill for high rigidity
- Optimum spacing of front bearings to spindle nose for highest rigidity

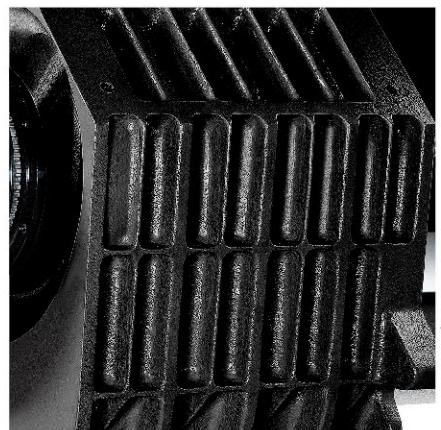

LEADWELL LTC SERIES FOR PRODUCTIVITY AND PROFITABILITY

LEADWELL's new LTC-35 series slant bed CNC turning centers are engineered for speed, precision, and enhanced productivity. You can depend on LEADWELL's LTC series to operate reliably year after year. The rigid construction provides superior stability for heavy metal removal and excellent workpiece accuracy. LEADWELL turning centers will ensure your business stays competitive and profitable.

LEADWELL Guarantees Superior Stability and Accuracy

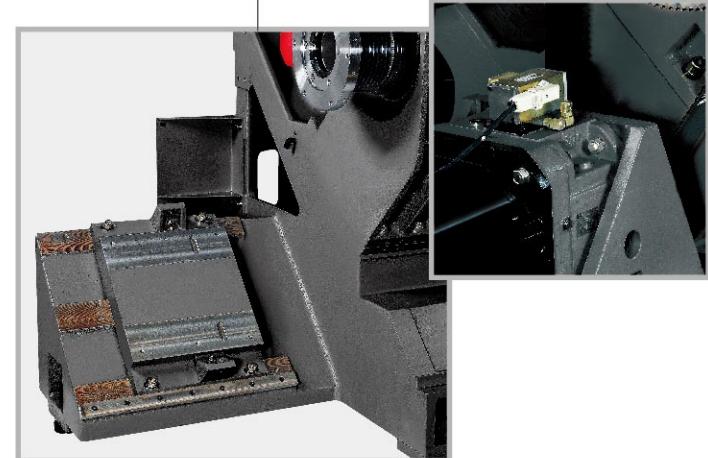

Superior Slant Bed Construction

LEADWELL turning centers are built from rigid cast iron construction to give a superior machining accuracy for years to come. The 45-degree slant bed allows for a stronger frame with easy access to the workpiece.

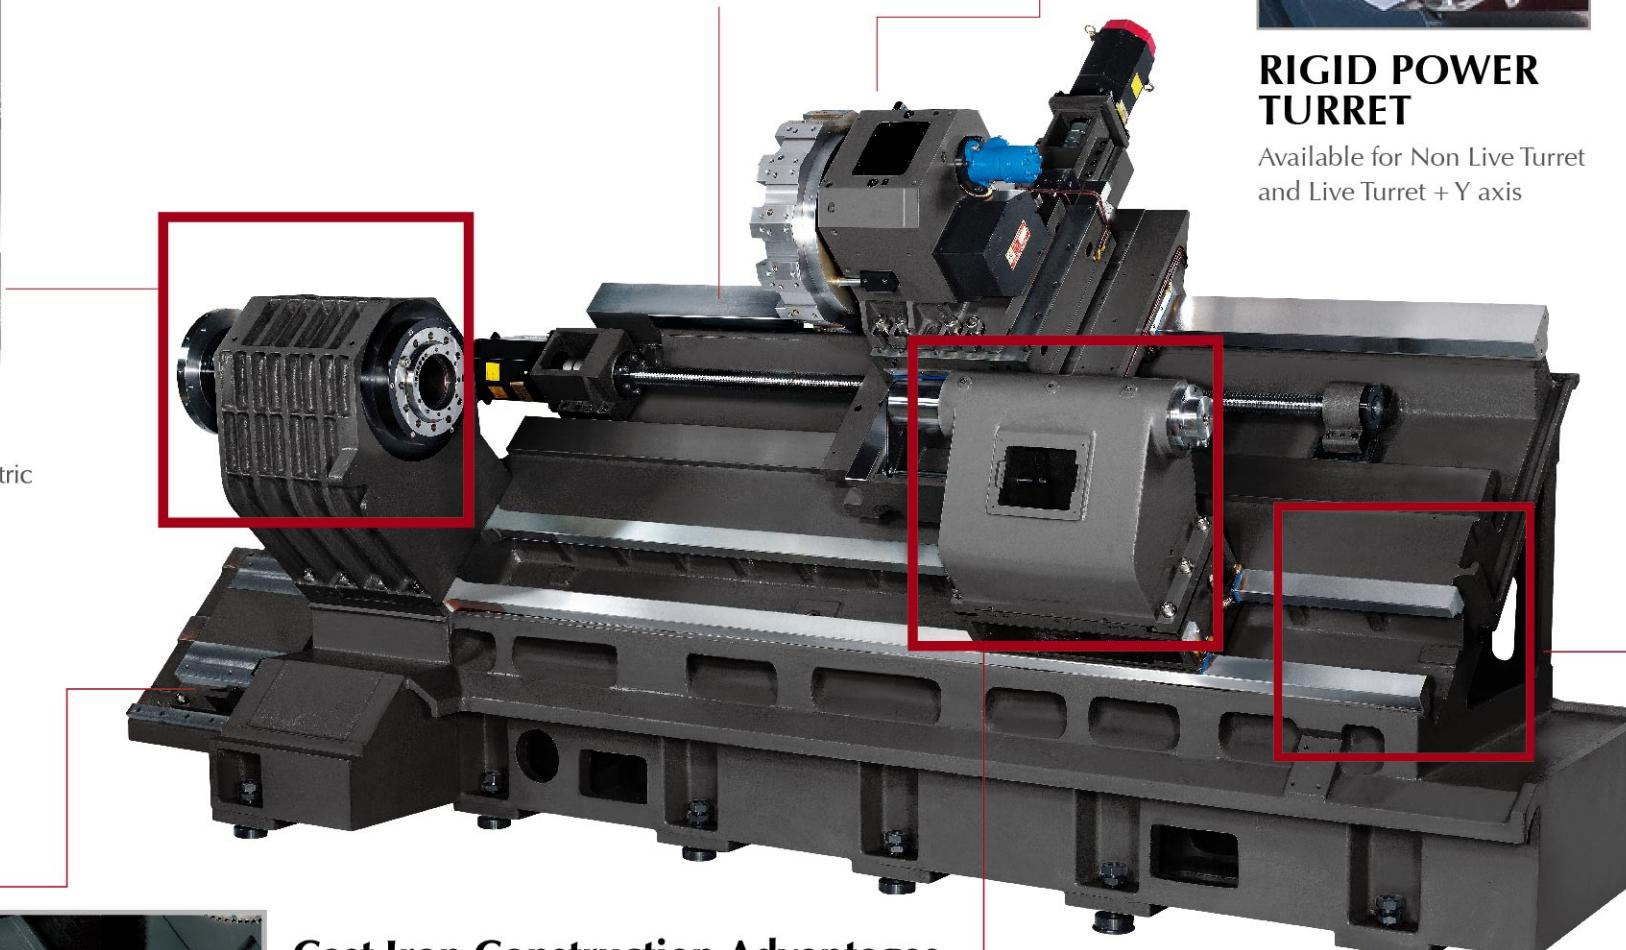

Headstock

The headstock has a thermally symmetric design with heat dissipating fins. This design prevents thermal distortion during long machining cycles.

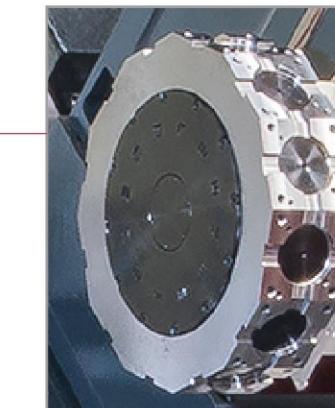

Extra Wide Span for Increased Stability

- The LTC series utilizes oversized box ways for high horse power machining. The extremely rigid base frame in combination with the box ways provide outstanding stability for precision turning.

Cast Iron Construction Advantages

- LEADWELL uses only top quality well-ribbed castings.
- Advanced Finite Elements Analysis (FEA) is used for analyzing new casting to determine the size and location of all internal ribs, ensuring high torsional stiffness and minimum vibration.
- The cast iron base, saddle, headstock, slide and tailstock are ruggedly constructed for superior stability and machining accuracy.
- Isolated gear box (opt.).

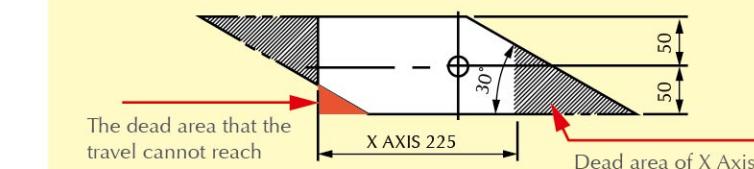

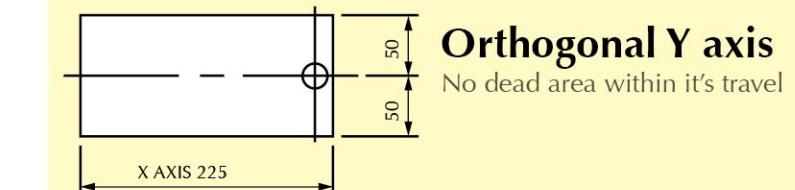

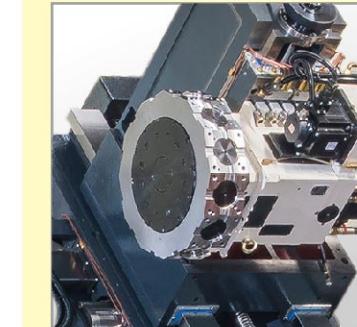

RIGID POWER TURRET

Available for Non Live Turret and Live Turret + Y axis

Orthogonal Y axis Explanation

Y axis is orthogonal placed on the X axis to ensure the full range of travel and to maximize the machining purposes.

Virtual Y axis

There will be dead area within it's travel, and requires complex programs.

Easy Chip Disposal

- The 45 - degree slant bed design allows chips to fall directly into the chip tank, avoiding accumulation inside the machine.
- The chip tank has large wheels, making it easy to move for chip removal and cleaning.
- An optional chain-type chip conveyor is available on all models.

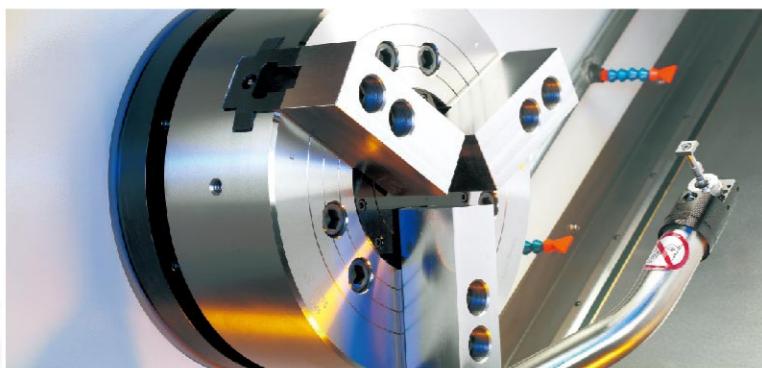

Rugged Tailstock

- The heavy-duty tailstock is attached to the lower guide of the machine base. The heavy casting, large diameter quill and precision morse taper center provide outstanding rigidity.
- The quill adjustment is hydraulic adding to the rigidity of the machine.
- Programmable tailstock is a standard accessory in LTC-35series.

LTC-35 SERIES

LTC-35 Series		Item
		Chuck Size
15"		
		Chuck Each LEADWELL lathe comes with a 3-jaw hydraulic through hole chuck.
12PCS(STD)	12PCS(OPT)	Tool Station Turret The LTC series turret features a robust casting and a large coupling face adding extreme rigidity to the machine. This added rigidity enhances the metal removal rates, extends tool life, improves finishing quality, and ensures long term accuracy. A reliable high torque hydraulic indexing motor controls turret rotation, deceleration and clamping. Turret indexing is bi-directional with 0.25 second station-to-station indexing time.

HIGH PRODUCTIVITY OPTIONS

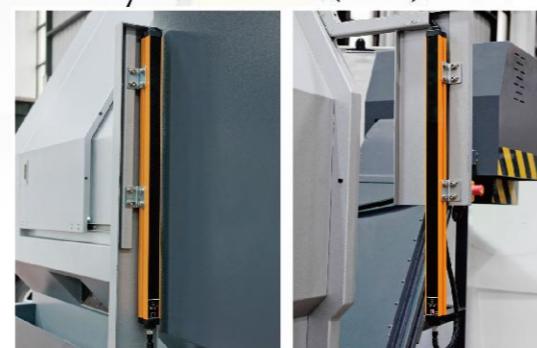

Double Chuck (OPT)

Tool Setter (OPT)

The tool setter has a touch sensor that can measure varying tool lengths and detect broken tools. It can be easily programmed to store all the tool information to reduce tool changing time.

Security Auto Door (OPT)

FEATURE

Quality Features Guarantee Greater Performance

HIGH CHIP REMOVAL RATE-EASIER THAN EVER!

When your operations require higher efficiency to stay competitive.

CUTTING TEST RESULTS

O.D.TURNING				
Cutting Feed rate M/min.	Cutting Depth mm.	Feed rate mm/rev.	Chip Removal Rate c.c./min.	Workpiece Material
180	11	0.35	1054.7	S45C

GROOVING

Cutting Feed rate M/min.	Slot Width mm.	Feed rate mm/rev.	Distance from Chuck Face	Workpiece Material
103.2	3	0.2	300 mm	S45C

DRILLING

FANUC Oi-T

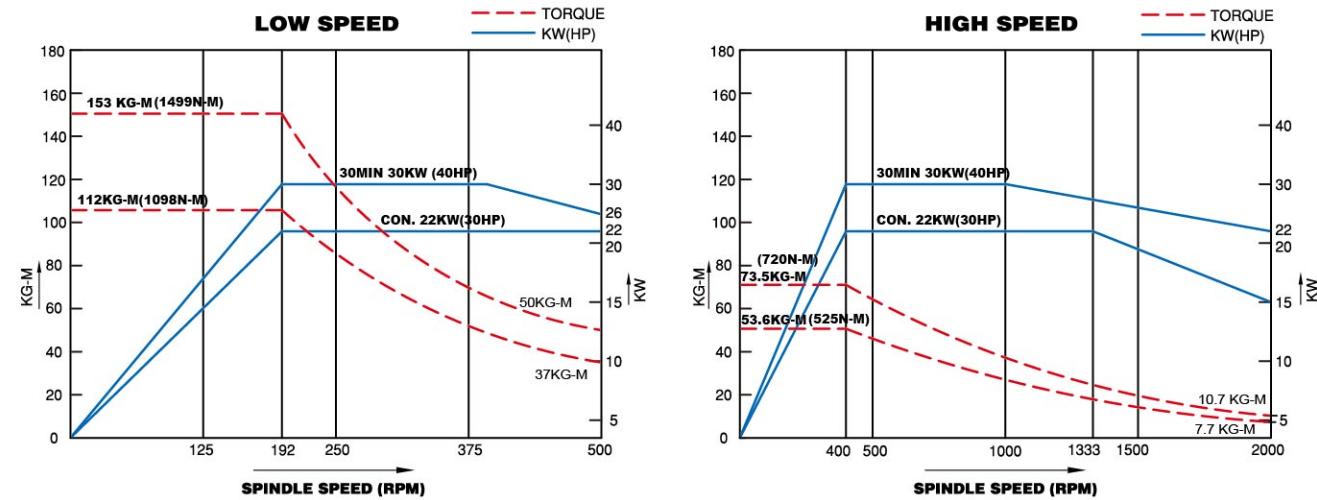

- Controlled axis
- Simultaneously controlled axes
- Least imput increment
- Emergency stop
- Mirror image
- Follow up
- Servo off
- Backlash compensation
- Stored pitch error compensation
- DNC operation
- Manual reference position return
- Exact stop
- Rapid traverse override
- Automatic acceleration / deceleration
- Override cancel
- Tape code: EIA RS244/ISO 840
- Label skip
- Optional block skip
- Decimal point programming
- Rotary axis designation
- Automatic coordinate system setting
- Workpiece coordinate system
- Programmable data input
- Rigid tapping
- Tool function
- Cutter compensation C
- Canned cycles
- Background editing
- Status display
- Clock function
- Self-diagnosis function
- Alarm display
- Part program storage length: 1280 M
- Multi language display
- Data server & CF card
- 8.4" color TFT
- 10.4" color TFT(OPT)
